Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim (US Pat. 5,869,924).

Kim discloses a cathode structure for a cathode ray tube electric gun (Figs. 9 and 10) comprising:

a common carrier assembly (53); and
a plurality of sub-assemblies (53a, 53b) on the common carrier assembly (53), each sub-assembly (53a, 53b) having a field emission array (53a), the array having a selected area and electrical bond pads (53b) for controlling emission current from the array (col. 4, lines 60-67 and col. 5, lines 1-23).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim.

Art Unit: 2821

Kim discloses substantially the claim invention as noted above except for the field emission array comprising of carbon-based emitter and having a diameter is approximately 70 micrometers as well.

It would have been an obvious matter of design choice for selecting a known material such as carbon to form field emission array with a certain diameter in order to reduce the material cost while ensuring image brightness focusing on a screen through a certain diameter of field emission array. Such implementation is considered as a routine skill in the art.

Allowable Subject Matter

5. Claims 5 and 6 are objected to as being dependent upon a rejected base claims, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims with correction as mention above.

6. The following is a statement of reasons for the indication of allowable subject matter: the prior fails to discloses a number of sub-assemblies mounted on a common carrier assembly is six or in the range between four to ten.
